Smart energy metering.

*Metering and monitoring with real time efficiency.*

**Venergy UI Smart Metering Features**

- Monitoring of actual power consumption.
- Monitoring of actual water consumption.
- Monitoring of actual gas consumption.
- Pricing Information.
- Attach functions, macros and conditions to actual consumption, meter reading and pricing.

**Hardware**

**Energy Meter Transmitter Module**
- 50 interface for single or three-phase meters.
- Only 0.5 watt standby loss.
- Wireless.
- For floor or building level.
- Available in 315 and 868 MHz.

**Single Phase Module**
- Maximum current 16A.
- Only 0.5 watt standby loss.
- Accuracy class A (1%).
- Wireless.
- For floor or device level.
- Available in 315 and 868 MHz.

**Real Time Metering**

- Real time energy monitoring.
- Wireless energy metering.
- Full building or circuit level metering.
- Monitor a single property or multiple properties remotely on a desktop or mobile device.
- Automated data reports.

**PC Based Clients**

- Full access on most cell phones.
